

R1D

**bāsiq+**  
bench system

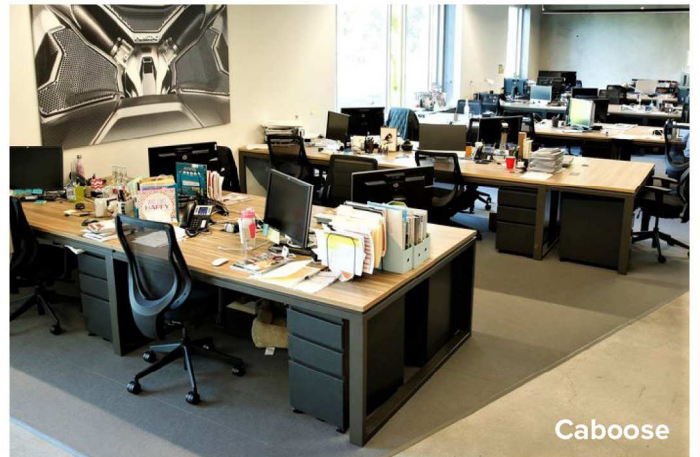

Harmony

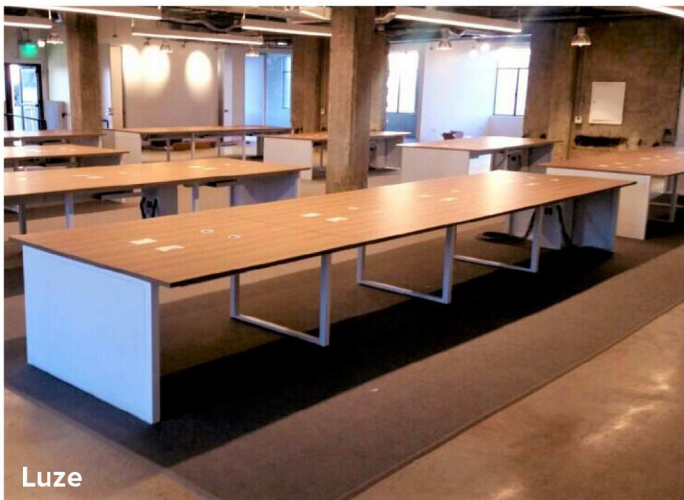

Departure

The basiq+ bench system is where R1D began, addressing the unique needs of our design partners and clients. Handsome and well-engineered, these styles were employed to answer design specific criteria germane to each project we were engaged in.

Submerged in the collaborative and iterative process, these tailored work-station renderings paved the way to the eventual 'discovery' of the basiq desk system; a function of 'addition by subtraction', as the basiq is the simplest of all our work-station products. The basiq+ bench system is available in a host of styles, dimensions, colors and finishes.
